

KIOSK - 6 DIFFERENTIATORS

1

ISO-9001
Certified

Each unit
undergoes
a 52-point
quality
inspection.

QUALITY

KIOSK is an ISO-9001 quality facility. This is the international standard for excellence in manufacturing. In order to maintain this certification, we are subjected to a stringent annual audit that evaluates, not only our manufacturing capabilities, but also our overall corporate processes and procedures.

Each unit produced by **KIOSK** undergoes a 52-point quality inspection that evaluates all the mechanical and electrical aspects of every product. These certification processes, combined with over eleven years experience building products for some of the largest corporations in the world, gives Kiosk a unique combination of real world experience that is unmatched in the industry.

Our continuous commitment to quality ensures that the products our customers receive are state-of-the-art. These stringent quality standards will guarantee success of any project and significantly reduce the costs associated with service and maintenance.

2

Able to fulfill
very large
orders with
relative ease.

CAPACITY

The number of units built and deployed by **KIOSK** on an average day is more than the average kiosk manufacturer can produce in a month. Our 65,000 square foot manufacturing facility has the capability of producing up to 300 individual units each day.

This will greatly improve our customer's speed to market, and gives **KIOSK** the ability to fulfill very large complex orders with relative ease.

3

When it
comes to
safety, we set
the industry
standard!

SAFETY

Underwriters Laboratories (UL) has been the worldwide standard in safety for over 100 years. **KIOSK** Information Systems, Inc. has the unique ability to provide our products with a UL certification prior to that product ever being deployed. As a matter of fact, the criteria for the UL Certifications applied to kiosks, were developed around **KIOSK's** products. So when it comes to safety, we truly can say we set the standard. The industry average for UL certification is 90 days. In other words, it will take virtually every other manufacturer three months to provide this certification, whereas we are able to provide it within a 7 business days.

The **KIOSK** UL process will improve the speed of your deployment and ensure that the projects you receive are safe and that our customer's liability with regards to their equipment in the field is significantly reduced.

In Europe, **KIOSK** provides products that are fully compliant with CE certification requirements.

4

We design units to fit any environment, and to serve every purpose.

FLEXIBILITY

KIOSK is not your “one size fits all” product manufacturer. With over 30 standard kiosk designs to choose from and thousands of custom units built over the past twelve years, there is no other company in the kiosk industry with more flexibility than **KIOSK**. We design units to fit all types of environments and locations to serve every purpose.

One of the many features that set **KIOSK** apart is our ability to design and engineer all of our products in-house. Special requests (additional signage, color, or a completely new design that is unique to you) will be accommodated without delays to your delivery schedule.

Your unique considerations combined with our experience will ensure that the product we deliver to you will be exactly what you envisioned. The end result being increased usage, easy serviceability and a faster return on your investment.

5

The world leader in kiosk design and manufacturing.

EXPERIENCE

KIOSK is the largest manufacturer of kiosks in North America. With over 30% market share and twelve years of profitable growth, we offer a wealth of experience that is unsurpassed in the industry.

We see our role being not only a manufacturer, but also a consultant to ensure that your project is a success. **KIOSK** has built virtually every type of self- service application in every type of location and environment imaginable.

We operate a 65,000 square foot manufacturing facility with over 70 employees solely dedicated to building, servicing and supporting self-service initiatives.

There is no value in building sub standard products that will not guarantee long-term success. We have become the leader in the industry by taking a consultative role in each of our projects.

You can rely on our experience to reduce the overall cost of your project and make certain that your deployment is utilized and successful.

6

The most comprehensive service and support program in the industry.

SERVICEABILITY

KIOSK designs each of our units so that the components inside the kiosk are each independent modules that can be serviced easily in the field.

This approach to design will significantly reduce the total cost of ownership by limiting the number of service calls, (most components can be replaced at the location in five minutes or less) and by only replacing those components that need replacing as opposed to buying an entirely new unit.

We will take into consideration where the kiosks are placed, who will service these units, and how easily each component can be accessed. Our 30 plus standard designs (and unlimited custom options) ensure that all access doors are available for every type of environment no matter where it is placed.
